**URBAN DISTRICT COUNCIL OF  
CONNAH'S QUAY**

ADJ BY  
hsc  
21/11/69

**ANNUAL REPORT OF THE  
MEDICAL OFFICER OF HEALTH  
AND  
PUBLIC HEALTH INSPECTOR**

**For the Year Ended  
31st December, 1968**

Public Health Department,  
Council Offices,  
Civic Centre,  
Connah's Quay.  
Deeside.  
Flintshire.

October, 1969.

To the Chairman and Members of  
THE URBAN DISTRICT COUNCIL OF CONNAH'S QUAY.

Mrs.Scott, and Gentlemen,

I have the honour to present to you my Annual Report on the health of the Urban District of Connah's Quay for the year 1968.

The estimated population for mid-year 1968 is 10,940, an increase of 540 on the figure for 1967. The birth and death rates are based on this estimated mid-year population.

For estimating birth and death rates for comparison with rates from other Districts and the rates for England and Wales, a comparability factor is given by the Registrar General, allowance being made for the age and sex distribution in the District. This factor in 1968 was 1.03 for births and 1.69 for deaths.

The total number of births during 1968 was 248 giving a crude birth rate of 22.66 and an adjusted birth rate of 23.33 per 1,000 population, compared with a rate of 22.96 in 1967, and with the birth rate of 16.9 for England and Wales for 1968. There were 16 more births than in 1967.

The number of deaths during the year was 88 as compared with 83 in 1967 and 78 in 1966, giving a death rate of 8.04 per 1,000 population as compared with a rate of 7.98 for the District in 1967 and a rate of 11.9 for England and Wales for the year under review.

Digitized by the Internet Archive  
in 2016 with funding from  
Wellcome Library

<https://archive.org/details/b2883866x>

There were 5 deaths of infants under 1 year of age during 1968, giving a rate of 20.16 per 1,000 live births, compared with a rate of 14.0 per 1,000 live births for England and Wales during the year, and a rate of 25.86 per 1,000 live births in this District during 1967.

There were again no deaths from Diphtheria or Poliomyelitis, and it should be stressed that immunisation against these diseases is still a "must" so that this record can continue.

Of the 88 deaths during the year 46 occurred from disease of the heart and circulatory system i.e., 52.2% of all deaths. Cancer accounted for 20 deaths i.e., 22.72% of all deaths. Bronchitis, Pneumonia and other respiratory diseases accounted for 8 deaths i.e., 9.0% of all deaths. So that these 3 main groups of disease, i.e., disease of the heart and circulatory system, cancer and respiratory infections accounted for 83.92% of the deaths.

There were no deaths from pulmonary tuberculosis, compared with 2 in 1967.

There were 3 deaths due to Cancer of the lungs and bronchus, and 17 deaths from other forms of Cancer.

There were no new cases of Tuberculosis notified during the year, compared with 2 in 1967 and 1 in 1966.

During 1968, notifications were received of 67 cases of measles, 2 cases of scarlet fever, 1 case of pneumonia, and 2 cases of food poisoning.

The milk, ice-cream, water and swimming bath samples taken during the year were satisfactory.

In conclusion, I must again thank all members of the Health Committee for their support, and in particular your Chairman Councillor Mr. Morley Thomas M.B.E., J.P. your Clerk

Mr. L. Williams has been most helpful and I owe much to him and to Mr. C. Stoddard, Public Health Inspector, for the smooth running of the Health Department. Mr. M. Watkin, Additional Public Health Inspector and Mrs. Jean Roberts, Clerk/Typist have both been of great assistance to me during the year and I am grateful for their good work.

I am, Mrs. Scott and Gentlemen,  
Your Obedient Servant.

D.J. FRASER.

MEDICAL OFFICER OF HEALTH.

## SECTION A.

### STATISTICS AND SOCIAL CONDITIONS OF THE AREA.

Area	4,218 acres.
Population (estimated).	10,940
Rateable Value	£1,683,819.
Product of Penny Rate	£7,095.

### INDUSTRIAL AND SOCIAL CONDITIONS.

The Urban District of Connah's Quay is on the South West Bank of the River Dee. The climate is temperate in all seasons, making the winter somewhat mild and giving the district a healthy aspect.

There is very little unemployment in the District.

Most of the male adult population are employed at a local Steelworks, or in work connected with the Steel Industry.

Some of the population work at Courtaulds Synthetic Fibre Factories at Flint and Greenfield.

In recent years, some local people and especially those who are recently arrived in the district, work at the Vauxhall Motor Works at Ellesmere Port in Cheshire.

With the continued building of housing estates, there is an influx of new residents. It would be desirable for the well being of the area if the newcomers brought industry with them. Dormitory towns and long distance commuting to and from work do not foster a sense of community.

# V I T A L   S T A T I S T I C S .

Population: Registrar General's estimate at mid-year 1968:- 10,940.  
1961 Census - 8375.

## Live Births:

Number - 248  
Rate per 1000 population - 22.66  
Adjusted local birth rate - 23.33  
National birth rate per 1000 population - 16.9  
Illegitimate live births - 12  
Illegitimate live births per cent of total live births - 4.83

## Still Births:

Number - 1  
Rate per 1000 total live and still births - 4.01  
National still birth rate - 14  
Total live and still births - 249

Infant Deaths (under 1 year) - 5

## Infant Mortality Rate -

Total infant deaths per 1000 total live births - 20.16  
Legitimate infant deaths per 1000 legitimate live births - 16.94  
Illegitimate infant deaths per 1000 illegitimate live births - 83.33  
National infant mortality rate per 1000 live births - 18

Neo-natal mortality rate (deaths under 4 weeks per 1000 total  
live births) - 16.12

National neo-natal mortality rate - 12.3

Early neo-natal mortality rate (deaths under 1 week per 1000  
live births) - 16.12

National early neo-natal mortality rate - 10.5

Peri-natal mortality rate (Still births and deaths under 1 week  
per 1000 total live and still births) - 20.08

National peri-natal mortality rate - 25

## Maternal mortality (including abortion):

Number of deaths - nil  
Rate per 1000 total live and still births - nil.

Deaths (from all causes). - 88.

Crude death rate per 1000 population - 8.04  
Adjusted local death rate - 13.58  
National death rate per 1000 population - 11.9

SECTION B.

GENERAL PROVISIONS OF HEALTH SERVICES IN THE AREA.

STAFF.

Medical Officer of Health:-

Doctor D.J. Fraser,  
M.B., Ch. B., D.P.H.

Public Health Inspector:-

Mr. C. Stoddard M.A.P.H.I.

Additional  
Public Health Inspector:-

Mr. M.A. Watkin M.A.P.H.I.

Clerk:-

Mrs. Jean Roberts.

The Medical Officer of Health in addition to being Assistant County Medical Officer is Medical Officer of Health to the Borough of Flint, the Urban Districts of Connah's Quay, Mold and Buckley and the Rural Districts of Hawarden and Maelor.

The Public Health Inspectors Department is responsible for the supervision of refuse collection and disposal, work under the Public Health Acts, Housing Acts, Food and Drugs Act, Prevention of Damage by Pests Act, Pet Animals Act, Slaughter of Animals Acts, Clean Air Act, Factories Act, 1937 and the Offices, Shops and Railway Premises Act, 1963.

NATIONAL ASSISTANCE ACT, 1948.

NATIONAL ASSISTANCE (AMENDMENT) ACT, 1951.

(Removal to suitable premises of persons in need of care and attention).

One case was dealt with under these Acts. She was an old lady of 83 years, living alone in a council house. She was in poor health and was unable to look after herself. The neighbours were afraid that she might cause a fire in the house. She was removed under a Magistrate's order to Hafan Glyd Home for the Aged.

.....

#### LABORATORY FACILITIES:-

1. The Public Health Laboratory Service, Conway.
2. The Royal Infirmary, Chester.
3. Public Health Laboratory Service, City Hospital, Chester.
4. Messrs. Ruddock and Sherratt, Public Analyst,  
Watergate Street, Chester.

#### NURSING IN THE HOME:-

The nursing of non-infectious sick is provided by the Flintshire County Council under the National Health Service Act, 1948. Home help is provided in the District.

#### CLINICS:-

The Flintshire County Council provided Clinic facilities at the Civic Centre, Wepre Drive as follows:-

Maternity and Child Welfare	Weekly.
Dental Clinic for Children and Expectant Mothers.	Weekly.
Speech Therapy.	Weekly.
Handicraft Class for Physically Handicapped Adults.	Weekly.
Paediatric Clinic.	Monthly.
Antenatal Clinic.	Weekly.
Blood Transfusion Service.	Half Yearly.
Mothercraft Class.	Weekly.

The Mental Welfare Office for the Deeside Area and Home Visitor to handicapped persons on the staff of the County Medical Officer have offices in the building.

A voluntary staff attend the Maternity and Child Welfare Clinics to distribute baby foods.

#### HOSPITALS:-

1. The Liverpool Hospital Regional Board (which includes Chester).
2. Clwyd and Deeside Management Committee.

#### MEALS ON WHEELS:-

A meals on wheels service supplies hot meals to elderly people twice a week.

### SECTION C.

#### SANITARY CIRCUMSTANCES IN THE AREA.

The Central Flintshire Water Board is responsible for the water supply for the Urban District which is drawn from The Alwen Aquaduct, the local source having been abandoned.

During the year 19 samples of water from various parts of the district were submitted to the Public Health Laboratory Service by the Health Department for examination and were found to be satisfactory.

#### (1). DRAINAGE AND SEWERAGE.

Work commenced in July, 1968, on the extensions to the Sewage Works; the total cost of which will be over £140,000.

Progress is satisfactory and the contract should be completed towards the end of this year.

In spite of the disruption to the running of the existing works, a satisfactory standard of effluent is being maintained.

Scraping and cleaning of the sewers in the main road has recently been carried out and this has resulted in an improvement to the flooding which occurred periodically in the recent past.

## (2) RIVERS AND STREAMS.

There are two streams flowing into the river and since the opening of the new sewage works during 1965 there has been a marked decrease in the pollution of the banks of these streams.

## (3) PUBLIC CLEANSING.

Public cleansing is carried out satisfactorily.

## (4) REFUSE COLLECTION AND DISPOSAL.

A weekly collection of household refuse was maintained during the year and facilities are provided for the collection and disposal of other refuse at the request of the householder.

The tip is in a sand pit used by the Council, and a Weatherill Loading Shovel is used for covering and levelling the deposited refuse.

Regular insect and rodent control measures are taken and there is no evidence of any major infestation.

## (5) SMOKE ABATEMENT.

The existing Smoke Control area has created no major problems during the year under review, nor were there any complaints regarding industrial users.

(6) SWIMMING BATH AND POOLS.

MR. W.H. CAMPS, THE MANAGER OF THE COUNCIL'S SWIMMING BATH  
HAS SUPPLIED THE FOLLOWING INFORMATION ON THE SWIMMING BATH:

"The Swimming Bath was opened on the 12th August, 1961. It lies on the South side of the Civic Centre. The pool is 110ft. long and 42ft. wide, this length allows for National Events to take place. It is 3ft. deep at the shallow end and 11ft. 6 ins. at the deep end.

The whole of the bath surround is tiled with non-slip tiles, and the pool is tiled with blue tiles.

The bath is provided with a 1 metre and a 3 metre spring board, also a 3 metre firm board, so diving competitions can take place.

Alongside the bath are the changing rooms, clothing storage rooms, shower baths, foot baths and toilets are conveniently placed for the use of the bathers.

The pool holds 188,000 gallons of water, every 4 hours this water goes through a filtration and sterilisation process, it is drawn from pumps from the deep end of the pool, it then goes through strainers, and then on to the sand pressure filters. After filtration, it is re-heated and chlorine is then injected into it to sterilise it.

The chlorine is used not only as a sterilising agent, although that is its main function, but also as an active strong oxidising agent performing many other useful functions in the process of water treatment.

The water is then returned to the pool at the shallow end of the bath.

The bath staff take tests every 3 hours to ensure that the water is kept at the standard laid down by the

Ministry of Health. The Public Health Inspector also takes samples from the pool regularly, these are sent to a laboratory where the water is put through a much stricter test than can be carried out at the baths, reports of these samples are sent to the Medical Officer of Health, the Public Health Inspector and myself.

The heat for the bath is produced by two oil burning boilers and is thermatically controlled. These boilers also supply the hot water for the showers, wash hand basins etc".

The following number of people attended the bath in 1968:-

Adults	...	59,453
Juniors	...	108,960
Spectators	...	25,206
Swimming Lessons	...	5,500
Classes	...	150

Schools.

Flintshire Schools.	28,816
---------------------	--------

During the year 104 samples of water were taken from the bath for bacteriological examination.

(7) ATMOSPHERIC POLLUTION.

At the end of 1959 two stations were equipped for the measurement of atmospheric pollution at Bryn Deva School and Wepre Hall Gardens.

The monthly reading during 1968 compared with 1967 were as follows:-

(a) MEASUREMENT OF SULPHUR DIOXIDE WITH LEAD PEROXIDE APPARATUS.

MONTH	BRYN DEVA SCHOOL.		WEPRE HALL GARDENS.	
	1967	1968	1967	1968
January	1.13	0.91	0.30	0.36
February	0.48	2.28	0.89	1.08
March	-	0.76	0.17	0.22
April	1.13	0.74	0.64	0.39
May	0.34	0.47	0.74	0.30
June	0.15	0.57	0.38	0.30
July	0.14	0.67	0.31	0.39
August	0.26	0.48	0.39	0.29
September	0.51	0.20	0.20	0.70
October	0.43	0.55	0.08	0.29
November	0.37	0.45	1.3	0.58
December	0.40	1.70	0.51	0.78
Average Monthly Reading:	.49	.815	.50	.47

The above is a grapg to show the Mgs of  $\text{SO}_3$  per day collected by 100 sq. CMS. of Batch "A"  $\text{Pbo}^2$ .

Collected during the period January, 1968 to December 1968.

SECTION D.

PREVALENCE OF AND CONTROL OVER INFECTIOUS  
AND OTHER DISEASES GENERALLY.

NOTIFICATIONS  
DURING  
1968.

INFECTIOUS DISEASES:-

Measles	...	67
Pneumonia	...	1
Scarlet Fever	...	2
Meningitis	...	1
Food poisoning	...	2

Of the 2 food poisoning cases, one was due to *Salmonella* Typhimimum. This baby was treated in hospital. There was no infection in any other members of the family. The other case, due to *Salmonella* Abony was in a young child. The source of infection was traced to a pet tortoise, which was carrying the infection. The child was treated in hospital and the tortoise was disposed of by the R.S.P.C.A.

TUBERCULOSIS (NEW CASES NOTIFIED):

Pulmonary	...	0
Non-Pulmonary	...	0

The following is a list of the names of the persons who have been  
 admitted to the office of the Secretary of the Board of Education  
 since the last meeting of the Board.

SECTION E.

FOOD SUPERVISION.

(1) NUMBER OF FOOD PREMISES IN THE AREA:-

Butchers	...	7
Licensed Premises	...	15
Cafe, Restaurants etc	...	3
Canteens and School Kitchens	...	9
Fish Friers	...	6
Fishmongers	...	-
Greengrocers and Fishmongers	...	2
Greengrocers	...	9
Grocers	...	22
Bakehouses	...	-
General	...	9
Manufacture of cooked meats and sausages.	...	3
Wholesale Meat Supply	...	-
Supermarkets	...	4

(2) NUMBER OF PREMISES REGISTERED UNDER SECTION 16 OF THE  
FOOD AND DRUGS ACT, 1955.

1.	For the manufacture, storage and sale of ice-cream (complete cold mix).	=	-
2.	For the storage and sale of ice-cream.	=	36
3.	For the manufacture of cooked meats and sausages.	=	4

(3) NUMBER OF INSPECTIONS OF REGISTERED FOOD PREMISES.

1.	Ice-cream premises.	=	10
2.	Manufacture of cooked meats and sausages.	=	40

(4) EDUCATIONAL ACTIVITIES.

Publicity material was distributed to various food premises and schools.

(5) METHOD AND DISPOSAL OF CONDEMNED FOOD.

- (a) Tinned goods etc., are buried in the Council's refuse tip after all containers have been opened.
- (b) Meat and offal condemned at the Slaughterhouse in the District is dyed and the owners are permitted to dispose of it to an animal by-product firm in the neighbouring district, and to a mink farm.

(6) SPECIAL EXAMINATIONS.

No special examinations were made of any stock or consignment of food.

(7) ICE CREAM HEAT TREATMENT REGULATIONS.

Samples were taken from retailers registered for the storage and sale of ice-cream and were reported on as follows:-

ICE-CREAM SAMPLES.

Grade 1	...	5
Grade 2	...	2
Grade 3	...	1
Grade 4	...	0
1 Ice Lolly	...	Satisfactory.

All registered retailers sell pre-packed ice-cream. A number of retailers from outside the area visit the District in the evenings and at weekends selling loose ice-cream, mainly in vehicles fitted for the manufacture and sale of soft ice-cream.

The standard of hygiene in these vehicles is satisfactory.

(8) MILK SUPPLIES - BRUCELLA ABORTUS.

(a)	Number of samples of raw milk examined	=	2
(b)	Number of positive samples found	=	-
(c)	Action taken in respect of positive samples.	=	-

(9) THE LIQUID EGG (PASTEURISATION) REGULATIONS, 1963.

There are no egg pasteurisation plants in the District.

(10) FOOD HYGIENE (GENERAL) REGULATIONS, 1960.

(a)	Number of premises complying with Regulation 16.	=	89
(b)	Number of premises to which Regulation 19 applies.	=	72
(c)	Number of premises fitted to comply with Regulation 19.	=	72

No serious breach of the Regulations were found during the year, but the difficulties caused by frequent changes of staff and the failure to use facilities provided continued to be met.

(11) POULTRY INSPECTION.

There are no poultry processing premises in the District.

(12) MEAT INSPECTION.

There is one small licensed slaughterhouse still in operation in the District to meet the requirements of the occupiers shops. Most of the slaughtering takes place on Sundays and Monday and Tuesday afternoon.
